

SOLUTION BRIEF

Virtual CISO

Executive-level advisory and consulting services

Expert leadership for security, privacy, and regulatory challenges

The Armor vCISO combines client knowledge with industry experience to build an integrated strategy that delivers data protection, risk management, governance, compliance, and reporting, along with a roadmap for any needed program changes.

Let Armor help fill your resource gaps

Receive advisory service hours, bundled with a subscription package which can be drawn on to address any of the following areas:

- Cybersecurity Thought Leadership
- Representation to Executive Board
- Third Party Risk Assessment
- Security Awareness & Culture
- Business Continuity Plan
- Information Security Policies

Armor's vCISO becomes a trusted member of each company's management team and helps deliver core cybersecurity protection.

In addition to providing technical guidance, Armor's vCISO ensures regulatory and industry requirements are met and maintained over time.

Why Armor vCISO?

- Trade checkbox compliance with a culture of operational excellence
- Understand the risks in your business and what you're agreeing to
- Modernize your security posture while addressing the latest regulatory requirements
- Reduce uncertainty with Armor's certified expert guidance
