

Strengthen Security With The Armor Threat Protection Program

As a Microsoft Partner, Armor can help you get the most out of your Defender and Sentinel

Are you satisfied with your organization's cloud security?

Third-party vendors can introduce potential weaknesses. Employees may fall for phishing attacks or use weak passwords. Network infrastructure misconfigurations can be targeted by malicious actors.

With Armor, you can fortify security through Microsoft's Threat Protection Program Engagement. During the engagement, Armor will partner with you to identify, prioritize and mitigate potential attacks in your environment.

Program Features

Analyze

Analyze your priorities and requirements for deployment of Security Information and Event Management (SIEM) and Extended Detection and Response (XDR) systems

Define

Define scope and deploy Microsoft Sentinel and Microsoft 365 Defender in production environment, integrating them with Microsoft and third party solutions

Discover

Discover threats to cloud and on-premises and across email, identity, endpoints and data and demonstrate how to automate responses

Prioritize

Discover and prioritize vulnerabilities and misconfigurations across your organization

Plan

Plan next steps on how we can work together

Customer Benefits

- **Customized**
Exclusively focused on customer's specific security needs
- **Real Data**
Threat and vulnerability analysis based on customer's environment
- **Solution Oriented**
Mitigation solutions and actionable next steps
- **No-Cost**
Offered at no cost to participants accepted by Microsoft

Steps and Activities

Sample page from security report

Activities

- Set expectations with the engagement questionnaire
- Engagement walk-through, define and document deployment scope
- Configure engagement tools
- One-time upload of cloud discovery logs
- Explore threats using Microsoft 365 Defender, Sentinel and Defender Vulnerability Management
- Review results presentation

At the end of the engagement, you will receive a **detailed security report** summarizing the findings and security recommendations.

Our Microsoft Partnership

Armor is a Microsoft Solutions Partner with the designation in Security. We have Specialist Designation in Cloud Security and Threat Protection. Our team is a member of the Microsoft Intelligent Security Association (MISA) and won 2021 Partner of the Year in Singapore and Asia Pacific.
